ABOUT ME

MCA student at VIT and aspiring Software Engineer with hands-on experience building full-stack and AI-powered applications using React.js, Node.js, Python, and modern cloud technologies. Skilled in REST API development, authentication, database design, payment integration, and cloud deployment. Experienced in developing AI and performance-focused systems using PyTorch, CUDA, and TensorRT, including an autonomous gaming assistant and real-time telemetry platform. Interested in building scalable, intelligent, and performance-driven software systems.

EDUCATION

(2026-2027)

VELLORE INSTITUTE OF TECHNOLOGY

(2022-2025)

NETAJI SUBHASH ENGINEERING COLLEGE

BCA - 7.86

PROJECT EXPERIENCE

MISSION CONTROL - THE ULTIMATE GAMING AI DASHBOARD

MAY 2026 - AUG 2026

Tech Stack: Next.js, Electron, Python, FastAPI, PyTorch, CUDA, TensorRT, DirectX 12, Vulkan

- Developed an AI-powered gaming dashboard and desktop application for real-time hardware monitoring, game optimization, and in-game tactical assistance.
- Built a decoupled Next.js + Electron frontend with a Python/FastAPI backend for high-performance native desktop communication.
- Integrated NVIDIA CUDA, PyTorch, and TensorRT for local AI inference, hardware acceleration, and GPU-optimized processing.
- Developed an in-game HUD overlay with DirectX 12 and Vulkan integration for real-time telemetry, tactical AI guidance, and system controls.
- Implemented automated game scanning to detect installed titles and configure performance-related settings including DLSS and Reflex.
- Developed hardware monitoring and optimization features for GPU utilization, VRAM, thermals, and system resource management.
- Designed the application around local processing and zero cloud dependency, enabling privacy-focused AI inference and telemetry.

G-ONE MEDIA - AGENCY PORTAL

MAY 2026 - JUN 2026

Tech Stack: React.js, Node.js, Express.js, Supabase, Razorpay

- Co-founded and developed the official agency portal for G-One Media, providing a platform for showcasing web development, AI solutions, and digital services.
- Built responsive and modern UI components using React.js with a focus on performance and cross-device compatibility.
- Developed backend services using Node.js and integrated Supabase for database management and application data.
- Implemented client-facing service workflows and streamlined project inquiry and management functionality.
- Integrated Razorpay for secure online payment processing and transaction handling.
- Deployed and maintained the application using cloud hosting and Git-based version control.

FOODIE FRENZY — FULL STACK RESTAURANT PLATFORM

JUL 2025 – MAR 2026

Tech Stack: React.js, Node.js, Express.js, MongoDB, Razorpay, Firebase

- Built a full-stack restaurant ordering platform supporting user accounts and order management.
- Developed RESTful APIs for authentication, orders, and user management.
- Implemented JWT-based login system with role-based access control.
- Integrated Razorpay payment gateway and implemented webhook verification.
- Designed MongoDB schemas and optimized queries for performance.
- Deployed application using cloud hosting and Git version control.

RIMBERIO — REAL ESTATE WEB APPLICATION

APR 2024 – JUN 2025

Tech Stack: React.js, Node.js, Express.js, SQL, Azure, Razorpay, Firebase

- Built property listing platform enabling users to browse and manage real estate listings.
- Designed relational database schema for listings, users, and transactions.
- Implemented CRUD APIs with validation middleware.
- Implemented secure authentication and session handling.
- Deployed backend services on Microsoft Azure cloud infrastructure.

SKILLS

LANGUAGES

Languages: Python, Java, C#, JavaScript
Frontend: React.js, Next.js, TailwindCSS
Backend: Node.js, Express.js, Django
Databases: MongoDB, PostgreSQL, MySQL
Tools: Git, GitHub, Azure, Firebase
Concepts: REST APIs, Authentication, MVC
